

- Improve the security of Florida's transportation system.
- Improve Florida's ability to use the transportation system to respond to emergencies and security risks.

Goal: Maintain and operate Florida's transportation system proactively

Objectives:

- Achieve and maintain a state of good repair for transportation assets for all modes.
- Reduce the vulnerability and increase the resilience of critical infrastructure to the impacts of climate trends and events.
- Minimize damage to infrastructure from transportation vehicles.
- Optimize the efficiency of the transportation system for all modes.

Goal: Improve mobility and connectivity for people and freight

Objectives:

- Expand transportation options for residents, visitors, and businesses.
- Reinforce and transform Florida's Strategic Intermodal System facilities to provide multimodal options for moving people and freight.
- Develop and operate a statewide high speed and intercity passenger rail system connecting all regions of the state and linking to public transportation systems in rural and urban areas.
- Expand and integrate regional public transit systems in Florida's urban areas.

- Increase the efficiency and reliability of travel for people and freight.
- Integrate modal infrastructure, technologies, and payment systems to provide seamless connectivity for passenger and freight trips from origin to destination.

Moving Forward

The 2060 FTP identified three issues critical to achieving the FTP goals and objectives: governance; investments; and immediate actions to begin implementation. The 2060 FTP calls for creating a 21st century governance model and a strategic approach to transportation investments to provide reliable funding for statewide, regional, and local priorities. Implementation of this plan will occur as Florida's transportation partners align plans and policies, coordinate activities, and measure and report progress toward achievement of the 2060 FTP.

Florida's Governor, Legislature, and public and private transportation partners have the opportunity and responsibility to implement the FTP and advance critical priorities. Together, FDOT and its partners will move Florida forward through the 21st century.

2060 Florida Transportation Plan

HORIZON
2060
a new era for transportation in florida

The Florida Transportation Plan (FTP) is the state's long range transportation plan. The FTP is a plan for all of Florida – including local, regional, and private partners responsible for transportation planning and funding decisions. The FTP identifies goals and objectives to guide transportation decisions over the next 50 years.

The 2060 Florida Transportation Plan marks a new era of transportation in Florida and calls for a fundamental change in how and where Florida invests in transportation. The FTP defines transportation goals, objectives, and strategies to make our economy more competitive, our communities more livable, and our environment more sustainable for future generations.

The department conducted extensive public and partner outreach as part of updating the FTP in 2010. A 29 member committee was formed to draft the 2060 FTP. The committee represented diverse interests from throughout the state: all levels of government and all modes of transportation, business and economic development organizations, community and environmental interests, the military, and private citizens. A statewide summit, 12 regional workshops, nearly 300 briefings at partner meetings, two statewide webinars, and an interactive website helped FDOT gather input from an additional 10,000 Floridians.

Transportation partners will be working together to achieve the six goals identified in the FTP over the next 50 years. Three goals focus on how transportation supports Florida's future prosperity and quality of life. The other three focus on the performance of the transportation system.

Goals and Long Range Objectives

Goal: Invest in transportation systems to support a prosperous, globally competitive economy

Objectives:

- Maximize Florida's position as a strategic hub for international and domestic trade, visitors, and investment by developing, enhancing, and funding Florida's Strategic Intermodal System (SIS).
- Improve transportation connectivity for people and freight to established and emerging regional employment centers in rural and urban areas.
- Plan and develop transportation systems to provide adequate connectivity to economically productive rural lands.
- Invest in transportation capacity improvements to meet future demand for moving people and freight.
- Be a worldwide leader in development and implementation of innovative transportation technologies and systems.

Goal: Make transportation decisions to support and enhance livable communities

Objectives:

- Develop transportation plans and make investments to support the goals of the FTP and other statewide plans, as well as regional and community visions and plans.
- Coordinate transportation investments with other public and private decisions to foster livable communities.
- Coordinate transportation and land use decisions to support livable rural and urban communities.

Goal: Make transportation decisions to promote responsible environmental stewardship

Objectives:

- Plan and develop transportation systems and facilities in a manner which protects and, where feasible, restores the function and character of the natural environment and avoids or minimizes adverse environmental impacts.
- Plan and develop transportation systems to reduce energy consumption, improve air quality, and reduce greenhouse gas emissions.

Goal: Provide a safe and secure transportation system for all users

Objectives:

- Eliminate fatalities and minimize injuries on the transportation system.
